

### **QUARTZ:**

93% pure quartz crystals mined from the earth and blended with 7% resin and color pigment.

#### **Features:**

- \* Extreme hardness (Scratch resistant).
- \* Twice the strength of granite.
- \* Non Porous / NSF rated. (Suitable for all food prep).
- \* Stain, and bacteria resistant.
- \* Maintenance free . (Clean with soap & water).
- \* Wide color selection.
- \* More consistent color pattern than granite.
- \* Not recommended for extreme heat applications.

### **GRANITE:**

Natural Stone mined from the earth in large block form, then cut into thinner slabs & polished.

#### **Features:**

- \* Natural stone (little human intervention of material).
- \* Every slab is unique in color and pattern. (No two slabs the same).
- \* Recommended customer selects actual slab from our suppliers warehouse.
- \* More porous than Quartz and requires sealing.
- \* Perfect choice for newly popular outdoor kitchens.
- \* Very durable material, not likely to scratch under normal use.
- \* Simply clean with soap and water.
- \* Limited warranty.

### **SOLID SURFACE:**

Made using high quality acrylic surfacing materials.

#### **Features:**

- \* A softer material than granite or quartz.
- \* Material can be fabricated into virtually any configuration without obvious seams.
- \* Marks & scratches can be removed easily to restore original appearance.
- \* Using solid surface bowls, a fully integrated countertop system can be achieved.
- \* Countertop seams are mended on site. (No visible seams).
- \* Highly used where sanitation is important.
- \* Excellent warranty.
- \* Not recommended for direct contact with sharp objects.
- \* Not recommended for extreme heat applications.

### **PAPERSTONE:** (Green Product)

The leading green surfacing product on the market, made from post-consumer recycled paper and a nut oil-based phenolic resin.

#### **Features:**

- \* Recycled paper product.
- \* Extremely high impact resistance.
- \* Non-porous surface & stain resistant.
- \* Excellent warranty.
- \* Color selection is limited and may vary slightly from sheet to sheet.

### **SOAPSTONE:**

A soft natural stone deriving its name because by touch it feels like a bar of handsoap.

#### **Features:**

- \* Considered one of the softest natural stones.
- \* Natural non-stick surface, that is heat resistant.
- \* Durable, easy to maintain, unique look.
- \* Stain and bacteria resistant.
- \* Scratches can be gently sanded out. Wear and tear adds to patina.
- \* Mineral oil to be applied to keep consistent, rich color.
- \* Colors will vary. (Normally a black/grayish color).
- \* Limited warranty.
